

12.01.2012

	HALL I	HALL II	HALL III
10:00 - 11:30	Opening Protocol speeches by senior officials from relevant public and private sector institutes and establishments such as Ministry of Energy and Natural Resources, Ministry of Education, Turkish Research Institute for Science and Technology, Unions of Chambers and Commodity Exchanges in Turkey, Union of Architects and Chambers of Architects in Turkey		
11:30 - 12:00	Award Ceremony & Opening Award presentations for winners of competitions held for industrial institutions, primary and secondary education students in 2011 by General Directorate of Electric Power Resources Survey and Development Administration. Visiting convention following the opening of the convention by protocol guests		
12:00 - 14:00	Lunch		
14:00 - 16:00	Energy Efficiency Strategies and Legislation of Turkey General framework of Energy efficiency strategies and legislation of Turkey, evaluation of this process according to European Union (EU) applications; the process, goals, missing points in harmonization, things to do, contradicting issues	Other Events TBA	Other Events TBA
16:00 - 16:15	Intermission		
16:15 - 18:15	Turkish Policies, Legislation, Action Plans and Environmental Impact for Renewable Energy Things to do to accelerate processes before and after licensing and handling all procedures through one agency, problems of the investors and suggestion for solutions	Energy Efficiency Strategies in Industry Evaluating how bottlenecks and problems in current processes in industrial sector can be solved by planning actions for industrial sector in the scope of Energy Efficiency Strategy document, solution suggestions for the problems and clarification of bottlenecks and increasing activity in planned actions	Other Events TBA
19:30	GALA DINNER		

13.01.2012

	HALL I	HALL II	HALL III
10:00 - 12:00	Role of Local Authorities in Energy Efficiency Evaluation of role and importance of local authorities in energy efficiency, sharing successful and sample examples, obstacles preventing local authorities to act more in energy efficiency and solution suggestions	Energy Efficiency Strategies in Building and Services Sector Evaluating how bottlenecks and problems in current processes in building and services sector can be solved by planning actions for building and services sector in the scope of Energy Efficiency Strategy document, solution suggestions for the problems and clarification of bottlenecks and increasing activity in planned actions	Other Events Information and experiences in integrated resource planning and modelling for optimization in utilization of energy resources, plans by Turkey will be presented to the partners.
12:00 - 14:00	Lunch		
14:00 - 16:00	Financing Mechanisms Financing models, processes, experiences for energy efficiency projects and activities and solution suggestions for sustainability	Energy Efficiency Strategies in Energy Cycle (Electrical Energy) Sector Evaluating how bottlenecks and problems in current processes in energy cycle (electrical energy) sector can be solved by planning actions for energy cycle (electrical energy) sector in the scope of Energy Efficiency Strategy document, solution suggestions for the problems and clarification of bottlenecks and increasing activity in planned actions	Other Events TBA
16:00 - 16:15	Intermission		
16:15 - 18:15	Energy Efficiency Technologies and Examples Potential for new technologies of energy efficiency in Turkey, its impacts, local manufacturing and discussion on how it can become widespread	Energy Efficiency Strategies in Transportation Sector Evaluating how bottlenecks and problems in current processes in transportation sector can be solved by planning actions for transportation sector in the scope of Energy Efficiency Strategy document, solution suggestions for the problems and clarification of bottlenecks and increasing activity in planned actions	Strategies for Raising Awareness and Communication Presenting Energy Efficiency Communication Plan (EVIP) to public opinion prepared by General Directorate of Electric Power Resources Survey and Development Administration in order to develop and raise awareness in society using the most efficient media tools at appropriate times for the appropriate audience so that efficiency in generation and consumption of energy should be prioritized by individuals and institutions, relevant missing points in the plan which will be revised annually, risks in operation and suggestions for solution of the problems
